Features	Benefits
Flanged larger diameter vessel	Longer contact time/lower bed velocity/reduced leakage
Removable stainless steel screen	Screens and vessels can be inspected and cleaned
Butterfly switching valves with SST disc	Better reliability and efficiency
Full flow, soft seat safety relief valves	Adherence to strict safety standards
Oversized mufflers with relief valves	Lower noise level at blow off and less back pressure
Status memory on any controller	Resume cycle where it stopped, avoiding bed saturation
Lifting eyes and forklift openings	Simplified installation
Adjustable purge	Purge optimization with varying inlet pressure
Remote Alarms (Free Contact)	Status information from a distance
Load/Unload Contact (If wired, stops unit when compressor unloads)	Improved operation to match actual demand profile
Low watt density heater	Lower thermal shock to desiccant bed

* Reference pressure for 165 psig design is 100 psig (max 150 psig), for 232 psig design, reference pressure is 180 psig (max 210 psig). Reference temperature is 100 °F inlet to dryer

** Not a standard option, please send in quote request for Pneumatech Engineered Product

† If -100 °F/-70 °C option is purchased

Correction Factor Example

Pressure	psig	73	87	100	116	131	145
Des Press: 165 psig	bar	5	6	7	8	9	10
	F1	0.75	0.88	1	1.13	1.25	1.39

Inlet temperature	F	68	77	86	100	104	113	122
	C	20	25	30	38	40	45	50
-40 °F (AA)	F2	1	1	1	1	0.84	0.71	0.55

Dew Point	F	-40	-100
	C	-40	-70
	F3	1	0.8

Max inlet flow for below conditions of PE-850:

130 psig inlet pressure,

104 °F inlet temperature,

-40 °F point target

Nominal flow*F1*F2*F3 = 850*1.25*0.84*1 = 893 cfm
